This permanent exhibition teaches visitors about Iceland's geology, geothermal energy production, and the park's operations. Interested visitors can book a tour [here](#).

The National Energy Regulatory has identified 30 wind energy projects for review under the Master Plan for Nature Protection and ...

We lease space, design the wind or solar parks in accordance with their individual requirements, take care of the permissions, structure the finance, secure the best terms for purchasing the ...

Welcome to Iceland's latest energy storage policy saga - where geothermal steam meets cutting-edge battery tech in a nordic dance of innovation. As of 2025, Iceland's updated strategy is ...

The project was first announced in 2018, with another 100MW project at Shannonbridge also unveiled. Together, the two battery energy storage systems (BESS) were set to involve a ...

To further diminish fossil fuel usage, solar energy and small wind turbines can be integrated to the systems. We possess extensive expertise in range of areas, including conducting technology ...

This infographic summarizes results from simulations that demonstrate the ability of Iceland to match all-purpose energy demand with wind-water-solar (WWS) electricity and ...

We lease space, design the wind or solar parks in accordance with their individual requirements, take care of the permissions, structure the ...

This development follows the Icelandic government's recent approval of the country's first wind farm,
