Do solar inverters contain undocumented cellular radio devices?

These inverters, which are essential components that convert direct current from solar panels into alternating current usable by the electrical grid, were found to contain undocumented cellular radio devices not disclosed in product specifications or technical documentation.

Could hidden communications equipment be found in Chinese-manufactured solar energy parts?

That has created a vulnerability that suddenly feels more real, as Reuters is reporting that experts have discovered hidden communications equipment in various Chinese-manufactured solar energy parts.

Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Did solar equipment have a built-in communication system?

It's not unusual for solar equipment to have built-in communication systems. These features allow companies to push software updates and monitor performance remotely. But the concerning part, according to Reuters, is that these specific devices were not documented. That means they were hidden on purpose.

US officials have warned that solar-powered highway infrastructure could contain hidden spy devices.

Experts have found hidden communication devices in Chinese-made solar components used across the U.S. energy grid.

WASHINGTON, Sept 10 (Reuters) - U.S. officials say solar-powered highway infrastructure including chargers, roadside weather stations, and traffic cameras should be scanned for the ...

Cellular radios and other undocumented devices were found in solar inverters and batteries. The transition to clean energy without sufficient domestic manufacturing options has ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within ...

In November, solar power inverters in the US and other places were shut down from China, highlighting the risk of foreign influence on local ...

WASHINGTON, Sept 10 (Reuters) - U.S. officials say solar-powered highway infrastructure including chargers, roadside weather stations, and traffic ...

Officials in the US have warned that solar-powered highway infrastructure from China should be scanned for hidden radios and other rogue devices secretly installed in ...

U.S. energy officials have intensified scrutiny of Chinese-manufactured components in renewable energy infrastructure after the identification of undocumented ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters ...

As reported by the Independent, officials from the transportation department have issued a directive that all traffic cameras and weather stations that are powered by in-built ...

As reported by the Independent, officials from the transportation department have issued a directive that all traffic cameras ...

In November, solar power inverters in the US and other places were shut down from China, highlighting the risk of foreign influence on local electricity supply and raising concerns among ...

Cellular radios and other undocumented devices were found in solar inverters and batteries. The transition to clean energy without ...

Certain power inverters and battery management systems (BMS), found in highway infrastructure equipment placed along US roads, ...

Certain power inverters and battery management systems (BMS), found in highway infrastructure equipment placed along US roads, contained "undocumented cellular ...
