---

This state-of-the-art energy storage solution is designed to support India's clean energy transition and strengthen the reliability of country's power infrastructure.

Jupiter Electric Mobility (JEM), part of the Jupiter Group, has launched a designed-in-India containerized battery energy storage system (BESS) offering capacities ranging from ...

India's government has introduced energy storage policies and financial incentives targeting hybrid battery adoption. Pilot projects in smart cities and renewable zones are ...

Compared to existing energy storage systems, typically offering around 6.25MWh of capacity, this new 10MWh container stands out due to its superior integration, enhanced AC ...

NEW DELHI | 8 May, 2025 -- The GEAPP Leadership Council (GLC) today officially announced the launch of India's first utility-scale, standalone Battery Energy Storage System (BESS) ...

With intelligent software capable of predictive load balancing, grid compliance, and virtual inertia, Voltra is preparing Indian ...

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, ...

In the next five years, technologies like energy storage and green hydrogen would fundamentally reshape India's renewable energy ecosystem, says a top company official.

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system

(BESS) capacity for both ...

The first containerised system was commissioned last month in Pune, India. The system, which was developed by Fimer for Replus, includes the former's MGS 100-120 kW ...

With intelligent software capable of predictive load balancing, grid compliance, and virtual inertia, Voltra is preparing Indian infrastructure for a future of decentralized, AI-driven ...

Developed ground-up in JEM, every component from the container to the battery and system integration is designed and manufactured in-house. This marks one of the few vertically ...
