A series of Israeli attacks on Iran's oil and gas facilities is threatening further turmoil for markets, as concerns grow of escalation in a region that holds half of the world's oil reserves.

Iran has one of the largest natural gas reserves in the world, but its beleaguered energy sector is plagued by outdated infrastructure, high domestic demand and inadequate storage capacity.

Iranian officials are sounding alarms over a deepening water crisis that has already affected nearly four dozen major dams, threatened electricity production, and forced Tehran ...
