Iraq is set to open its first industrial-scale solar plant in a vast desert area in Karbala as the government attempts to tackle an electricity crisis that has led to widespread blackouts.

Could large-scale solar power plants help ease Iraq's electricity crisis?

The projects are part of a larger vision to account for a portion of Iraq's electricity needs using large-scale solar power plants that could help ease the electricity crisis while also reducing the negative environmental impact of gas emissions.

Why is Iraq turning to solar?

"Farmers are turning to solar to reduce their bills and lower the load on water pumps. The electricity from solar is stable," he said. Apart from its oil riches, Iraq has vast solar potential that the authorities say they will use to close the gap between supply and demand, at the same time, reducing carbon emissions.

Is Iraq advancing solar power projects?

Iraq is advancing several solar power projects as part of a plan to meet its electricity needs. This aerial photo shows panels at a newly opened industrial-scale solar power plant in Karbala, Iraq, on September 17, 2025 [Anmar Khalil/AP]
