When you say "speaker" do you mean amplifier? If you're talking about using a 12v car/motorcycle/RV battery to power a guitar amplifier then you could get a power inverter. I ...

Safe - Yes if the cable is configured correctly, with no 5V wire between host and slave. Useful - Also yes as a correctly configured cable will prevent any current to flow from the ...

Electrical noise from the power supply can interfere with the amplifier's performance. High-quality power supplies include proper ...

If you want to play music indoors, outdoors, and everywhere, powering your gear might be tricky. This guide helps you to power your setup.

If you're looking to jam on the go or perform outdoors, using a car battery to power your guitar amplifier is a feasible and cost-effective solution. Since car batteries provide DC power, you'll ...

If you want to play music indoors, outdoors, and everywhere, powering your gear might be tricky. This guide helps you to power your ...

All mains wiring must use mains rated cable, segregated from input and low voltage wiring as required by local regulations. A power supply suitable for use with the 60W amplifier presented ...

All mains wiring must use mains rated cable, segregated from input and low voltage wiring as required by local regulations. A power supply suitable ...

I've even plugged in power strips and powered multiple devices. I've loaned it to a buddy who powered a PA
