-----

A 900-megawatt power plant that will be built at the Egged lot north of Jerusalem, along with a parking lot for electric buses.

Jerusalem, 28 December, 2025 (TPS-IL) -- The concession agreement was signed for the construction, operation and maintenance of a solar energy facility, using photovoltaic ...

While no single technology will solve our energy puzzles, projects like Jerusalem's storage plant prove we can keep the lights on without cooking the planet. The real question isn't whether to ...

Eco Wave Power, which has pioneered wave-power installations in Israel and Gibraltar, unveiled plans this year for a pilot wave-power project that will, in coming months, extract power from ...

Due to anticipated growing demand for electricity, because of population growth, economic growth and potential demand for data centers in the future, many plans are being ...

At the Port of Los Angeles, inside a massive warehouse that now incubates ocean-related research and innovation, a shipping container filled with energy technology will ...

Eco Wave Power believes it can make a splash and prove converting the ocean's waves into electricity isn't the impossible task some think it is; pilot project also underway in Jaffa.

Floating blue paddles dance on the waves that lap a dock in the Port of Los Angeles, silently converting the power of the sea into useable electricity.

With growing demand for renewable integration and grid stability, energy storage projects in Jerusalem have

become critical. These initiatives not only support solar and wind power ...

Eco Wave Power, which has pioneered wave-power installations in Israel and Gibraltar, unveiled plans this year for a pilot wave-power project that ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...
