Should you install an uninterrupted power supply system?

Installing an uninterrupted power supply system is advisable during short-term power outages and power surges, but the capacity of the UPS batteries is not enough for long-term operation of the equipment in the absence of a centralized power supply.

What is uninterrupted power supply?

The task of uninterrupted power supply is to gain time for a regular shutdown of energy consumers and save data. In the event of a prolonged failure of the main network, the uninterrupted power supply system (SGE) maintains the supply of electricity to the pantographs by autostarting the diesel generator set (DGU) and switching the load to it.

What is uninterrupted guaranteed power supply?

Unstable power supply and power surges can interfere with electrical equipment and damage sensitive electronics. For such cases, a reliable system of uninterrupted guaranteed power supply is needed, which will protect electrical appliances and provide an alternative power supply.

The LogicPower LPM-PSW-4500VA (3000W) UPS is a line-interactive uninterrupted power supply with a pure sine wave, designed to protect connected equipment from power outages ...

Uninterruptible power supplies to buy in Kiev and Ukraine. Electronic equipment and tools are being sold since 2011. We are the official partners of all the brands that are available. We ...

Uninterruptible power supply with 4 built-in Li-ion batteries with a capacity of 2200 mAh (total capacity 8800 mAh); maximum output power 17 W; output interfaces USB, DC \*3, PoE, output ...
