How much does a solar panel installation cost?

Solar panel installation costs vary by the installation company and project scope, making it challenging to pinpoint exactly how much you'll pay to have a pro install your solar panels. However, the U.S. Department of Energy estimates that installers add around \$2.25 per watt to the cost of a solar panel installation.

How much does a solar system cost?

Most installers set the price according to the system's wattage, with a typical cost between \$2.50 and \$5 per watt. The table below does not include the cost of a solar storage battery, which sometimes costs as much as the panels. Solar batteries are a must if you want real energy independence and essential if you go off-grid.

How much does solar cost in California?

The size of your solar panel system is a big factor in your total cost. On the high end, Matthias in Westlake Village told us he spent \$52,000 going solar. The average California household needs a 5.9 kW system to offset enough energy costs to make solar viable. Depending on your household energy usage, you might need a smaller or larger system.

Are high-quality solar panels worth it?

Like most things, high-quality panels come with a more expensive price tag, but they often pay off in the long run with better performance and durability. The more efficient your panels are, the more electricity they produce and the less space they take up on your roof.
