Latvia has set ambitious climate goals, aiming to source 57% of its electricity from renewable resources by 2030, according to the International Energy Agency (IEA). However, ...

Given Latvia's high share of renewable electricity, the need for electricity storage technologies will increase significantly. However, there ...

The plant occupies 110 hectares and is equipped with 156,000 solar panels capable of generating energy to supply more than 40,000 households per year. This development ...

Nordic Investment Bank (NIB), Luminor Bank and Nord/LB have agreed to co-finance a 148MW solar farm in Latvia, which will be one of the largest in the country when ...

Latvia has set ambitious climate goals, aiming to source 57% of its electricity from renewable resources by 2030, according to the ...

Solar and wind energy production alone experienced an impressive 92% surge in 2023 compared to 2022, and this momentum shows no signs of slowing down. Building on these ...

Latvia has officially inaugurated the V?rme solar farm, a significant 94 MW project developed by Ignitis Renewables. Spanning 101 hectares in the western region of Kuld?ga, the ...

The plant occupies 110 hectares and is equipped with 156,000 solar panels capable of generating energy to supply more than 40,000 ...

Creating new solar farms will reduce emissions from fossil fuel-based electricity generation and is a vital step towards a green ...

Latvia has officially inaugurated the V?rme solar farm, a significant 94 MW project developed by Ignitis Renewables. Spanning 101 ...

Given Latvia's high share of renewable electricity, the need for electricity storage technologies will increase significantly. However, there are also challenges, such as the need ...

Creating new solar farms will reduce emissions from fossil fuel-based electricity generation and is a vital step towards a green transition and energy independence. The Nordic ...

Latvia aims to increase renewable energy sources (RES) to 50% by 2030, but lacks specific solar targets in its current National Energy and Climate Plan (NECP).

Lithuania's SNG Solar is set to build a 100 MW solar plant in the port of Riga, Latvia. Upon completion, the facility will be one of the largest solar projects in the Baltics.

Ignitis Renewables, an international green energy company, has completed its first solar project in Latvia where V?rme solar farm, located in the Kuld?ga municipality, has ...
