China is leading the world in new solar and wind installations, and saw a decline in carbon emissions for the first time in May.

China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

The world's largest 1 GW offshore solar farm located off the coast of Dongying, Shandong Province, China is now connected to the grid.

The world's largest cluster of solar farms can be found in Qinghai, China, high on the remote Tibetan Plateau. It's far bigger than the USA's largest solar farm, and it's one of several ...

China is advancing a nearly 1.3 terawatt (TW) pipeline of utility-scale solar and wind capacity, leading the global effort in renewable energy buildout. This is in addition to China's already ...

China has brought a 1 GW offshore solar power plant online off the coast of Dongying, Shandong province, combining PV with energy storage and aquaculture in what is now the ...

Electricity from solar has overtaken hydropower in China and is poised to surpass wind this year to become the country's largest source of clean energy.

China is dominating the world in installed solar capacity, and the launch of its largest solar farm yet will bring it one step closer to a coal-free future.

China has achieved a major milestone by connecting the world's largest offshore solar power facility to its national grid. Located off the coast of Shandong Province, this ...

China has more utility-scale solar than any other country. The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 ...
