What is a foldable container?

It is, therefore, suitable for use by shipping lines and terminals. Foldable containers save up to 75% space and costs (50-60%). One standard container takes up as much space as four foldable ones. In addition, they are more environmentally friendly. The transport of foldable containers generates 37% less carbon dioxide.

What is a 4fold foldable container?

So it is that the 4FOLD foldable container from Holland Container Innovations (HCI) is providing a novel solution that not only reduces CO2 but offers a number of additional benefits -- more efficient to ship empties back (by a ratio of four to one!), space saving, and faster handling at the terminal.

How popular is a foldable container?

As previously noted, the foldable container is now used at more than 60 depots and ports and on 15 shipping lines and growing in popularity all the time. "The shipping industry is typically very conservative," said Broekhuis.

Are foldable containers better than traditional containers?

Foldable containers are more expensive than traditional ones. Innovative containers are more susceptible to damage and have a shorter lifespan. Despite these disadvantages, foldable containers are a transport solution of the future. They not only save space, time, and money but also lower your carbon footprint.
