-----

In January 2023, UNICEF Madagascar took a significant step towards sustainability by transitioning to solar power in our field offices. This decision ensures reliable electricity, ...

This solar venture, supported by a 3.2 MWh battery system, aims to cut energy costs and improve electricity reliability for the island's residents, covering 85% of daytime and ...

Madagascar is one of the sunniest countries in the world with more than 3,000 hours of sunshine per year. Commissioned in 2018, ...

Madagascar is one of the sunniest countries in the world with more than 3,000 hours of sunshine per year. Commissioned in 2018, Ambatolampy was the first large-scale ...

Madagascar had installed generation capacity of 969 megawatts as of 2021. Only 2 percent was sourced from solar energy, with the rest sourced from fossil fuel sources. Ambatolampy Solar ...

In a context of energy transition towards renewable energies, this case study situated in Madagascar allows us to verify the extent to which an on-grid photovoltaic solar power plant ...

Balglobal partners with Mytilineos on a pioneering 5MW solar plant in Madagascar. The project will power mining operations, cut 8,000 tonnes of CO2, and boost clean energy.

Madagascar is one of the sunniest countries in the world with more than 3,000 hours of sunshine per year, so decentralised solar power supply to rural areas is not only easier but also cheaper.

In January 2023, UNICEF Madagascar took a significant step towards sustainability by transitioning to solar ...

Indeed, with over 2800 hours of annual sunshine, high wind speeds, and massive hydropower potential, Madagascar represents one of Africa's most promising sources of ...

As a result, President Andry Rajoelina has ordered its rapid deployment. Furthermore, the government has also approved the progress of solar power plant projects of ...

Global South Utilities (GSU) has secured agreements with Madagascar to develop a 50 MW solar plant and a 25 MWh battery energy storage system (BESS) in the island nation.

As a result, President Andry Rajoelina has ordered its rapid deployment. Furthermore, the government has also approved the ...

Balglobal partners with Mytilineos on a pioneering 5MW solar plant in Madagascar. The project will power mining operations, cut 8,000 ...

The original power station with generation capacity of 20 megawatts, was commercially commissioned in 2021. That phase of development received funding from (a) Soci&#233;t&#233; G&#233;n&#233;r&#228;l (b) GarantCo (a subsidiary of the Private Infrastructure Development Group (PIDG) (c) Banque Malgache de l'Oc&#233;an Indien (BMOI) and (d) Banque Nationale d'Investissement (BNI) (National Investment Bank) of Madagascar.
