What will Malta's energy mix be like in 2019?

In 2019, natural gas made up 67% of Malta's energy mix for electricity generation. The planned second interconnector with Italy is likely to increase the share of imported electricity, while the continued deployment of renewable energy sources throughout Malta promises to make the country's energy mix much greener.

How much does electricity cost in Malta?

While Malta has the third-lowest nominal electricity price for domestic consumers in the EU at EUR0.131 per unit, when adjusted for PPS - a method used to compare costs between countries based on their cost of living - the burden on Maltese families is the lowest in the EU, at 14.33 PPS per 100kWh.

Where can I find energy tariffs in Malta?

Visit the website of the Regulator for Energy & Water Services to view these tariffs. Malta has moved to a sustainable energy mix of gas, renewables and electricity imports via the interconnector to generate electricity.

Does Malta use natural gas?

Following significant investments in the power station at Delimara, natural gas has replaced heavy fuel oil as the main fuel for electricity generation on the island. In 2019, natural gas made up 67% of Malta's energy mix for electricity generation.
