Mexican President Claudia Sheinbaum has unveiled a \$23.4 billion plan to expand the national electricity system, targeting 13.02 GW of new capacity by 2030, including 4.67 ...

Mexican President Claudia Sheinbaum has unveiled a \$23.4 billion plan to expand the national electricity system, targeting 13.02 GW ...

Mexico's National Commission for Regulatory Improvement (CONAMER) has published a draft agreement outlining the requirements for obtaining a generation permit for ...

These plants are expected to begin operations in June 2028, positioning CIP as the developer with the largest awarded capacity in this first permitting round and reinforcing the ...

Mexico's National Commission for Regulatory Improvement (CONAMER) has published a draft agreement outlining the requirements ...

Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that sets clearer rules for private energy investments.

Historically, the main applications of solar energy technologies in Mexico have been for non-electric active solar system applications for space heating, water heating and drying crops. As in most countries, wind power development preceded solar power initially, due to the lower installation cost. Since solar power is not available during the night, and because wind power tends to be complementary to solar, a mix of both can be expected. Both require substantial storage

In a significant boost to its renewable energy landscape, Mexico has recently approved 20 new renewable energy projects, including 15 solar initiatives that collectively add ...

Phase III of the project will add 300 MW of solar PV capacity and 90 MW of battery energy storage with a three-hour duration, with an estimated investment of MXN 6.49 billion. ...

Land has reportedly been secured for all of them and permits approved. The 20 projects will be located in the following Mexican states: Campeche, Hidalgo, Yucatán, ...

Inside a shipping container currently en route to a school in Puerto Rico, a solar microgrid is ready for deployment: as soon as the container arrives, the system, from a startup called BoxPower ...

Since solar power is not available during the night, and because wind power tends to be complementary to solar, a mix of both can be expected. Both require substantial storage to ...

Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that ...

The plan projects between 6,400 MW and 9,550 MW of new generation capacity, 96% from solar and wind, with clean power expected to account for 38% of total generation by ...
