What are mobile wastewater treatment and containerized sewage systems?

Mobile wastewater treatment and containerized sewage systems can be used in a very wide range of applications. They can be used for short term, mobile wastewater treatment where portable solutions are needed. But they can also be used for long term, fixed applications. They are specifically suited to applications such as:

What is a containerised portable waste water treatment plant?

A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary. In addition to that, the systems are modular so that they can work together in a variety of combinations effectively dealing with variable waste water volumes to achieve any effluent quality.

What is a Biocell water containerised wastewater treatment plant?

Biocell Water containerised wastewater treatment plants offer a fast and effective above ground portable wastewater treatment systemsolution for any site, without the need for any existing infrastructure. Containerized mobile treatment systems are ready to use immediately on delivery and cater from 60 persons to 20,000 persons capacity.

What is a mobile water treatment container?

These mobile systems are installed inside a seaworthy 20 or 40 ft containers or in combination to form complete systems with advanced water treatment and purification technologies. Those mobile treatment containers units come with insulation, diamond flooring, LED lighting, climate control and service hatches.

Our Mobile Treatment Plants can be customized for transport by truck, helicopter, or barge for easy relocation. The containers are equipped with venting, inside and outside lights, an ...
