Is Russia launching a 4G & 5G base station?

Russia is starting the production of 4G and 5G base stations that will use Russian-made software. This was announced on October 1 by Russian Prime Minister Mikhail Mishustin. We are now launching the creation of base stations with Russian software for 4G and 5G networks. Next year, we plan to establish mass production of such solutions.

Who created the first base stations in Russia for 5G networks?

On September 18, 2020, it became known about the creation of the first base stations in Russia for 5G networks. The development is carried out by the leading research center (FACE) "Global Wireless Communication Systems" on the basis of the company "GlobalInformService". Read more here.

How much Russian should a base station be for 5G?

Each base station for 5G networks in 4 years should be 40% Russian. The Government of the Russian Federation set such a task within the framework of the federal project "Digital Technologies" of the national program "Digital Economy". This is stated in the protocol of the Presidium of the Government Commission published in October 2020.

Will 5G provide new generation communication services in Russia?

According to the FAS, access to the released radio frequency spectrum for the construction of 5G networks and the subsequent provision of mobile radiotelephone services on 5G networks is an opportunity to provide new generation communication services in Russia.

"These stations will be the first domestic solution aimed not only at the Russian market, but also at international expansion," MTS said. During the exhibition, an active 5G ...
