SGL Carbon offers various solutions with battery materials based on specialty graphite for energy storage systems, including flow, lithium-ion, ...

The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now ...

Headquartered in Zibo, Shandong Province, China, Sunrise New Energy Co., Ltd., through its joint venture, is engaged in the manufacturing and sale of graphite anode material ...

At the heart of the energy storage revolution unfolding right now is graphite. Let's take a look at where you're likely to find graphite in this revolution. Before renewable energy can be stored, it ...

For years, lithium-ion batteries have been the go-to choice for energy storage in these critical sites. But now, a new contender is stepping onto the field: sodium battery ...

This review presents a comprehensive examination of graphene-based materials and their application in next-generation energy storage technologies, including lithium-ion, ...

The energy storage containerized solution can be charged through various sources, including grid power, solar energy, generators, and wind. This versatility enhances its appeal ...

A team of German researchers has built the world's first full battery system based on aluminum-graphite-dual-ion technology (AGDIB), marking a milestone for lithium-free ...

Graphite's role extends to the performance of photovoltaic cells, with efficiencies of up to 25% in solar energy

conversion. Furnace linings, graphite parts, and insulation all contribute to the ...

A team of German researchers has built the world's first full battery system based on aluminum-graphite-dual-ion technology ...

The energy storage containerized solution can be charged through various sources, including grid power, solar energy, generators, ...

Herein, an efficient strategy is developed to produce a MXene-configured graphite via an electrostatic interaction between MXene and silane coupling agent-modified graphite.

SGL Carbon offers various solutions with battery materials based on specialty graphite for energy storage systems, including flow, lithium-ion, lead-acid, and sodium-sulfur batteries.
