---

These innovative CO2 batteries from Energy Dome promise long-duration energy storage for the grid, and reliable 24/7 clean power for data centers.

In another record-breaking year for energy storage installations, the sector has firmly cemented its position in the global electricity market and reached new heights. From ...

Building US domestic energy storage manufacturing capacity will require more than limiting foreign participation, writes Aaron Marks of Intertek CEA.

Hydrostor secures key permit for 500 MW, 8-hour California energy storage facility The installation would be the Canadian company's first grid-scale deployment of its "advanced ...

From iron-air batteries to molten salt storage, a new wave of energy storage innovation is unlocking long-duration, low-cost resilience for tomorrow's grid. As the global ...

A new material called multiscale reduced graphene oxide could mean faster charging and power delivery than traditional batteries allow.

As the global energy transition accelerates, the need for reliable, scalable and cost-effective energy storage solutions has never been greater.

From iron-air batteries to molten salt storage, a new wave of energy storage innovation is unlocking long-duration, low-cost resilience ...

Experts credit much of the progress to a surge in battery energy storage systems in recent years. Battery storage in California has grown more than 3,000% since 2020.

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy ...

As the global energy transition accelerates, the need for reliable, scalable and cost-effective energy storage solutions has never ...

Experts credit much of the progress to a surge in battery energy storage systems in recent years. Battery storage in California has ...

Building US domestic energy storage manufacturing capacity will require more than limiting foreign participation, writes Aaron Marks of ...

Battery energy storage system (BESS) deployment in the United States is accelerating as rising power demand, including from data centres, drives the need for flexible capacity and grid support.
