---

Globally most solar PV is built by utilities, but in Africa 65% of new capacity over the past two years has come from large firms ...

Cheap Solar Is Transforming Lives and Economies Across Africa Chinese panels are now so affordable that businesses and families are snapping them up, slashing their bills and ...

The following table highlights the top 10 African solar markets by new solar installations (%) in 2024, reflecting the continent's evolving ...

Solar panel imports are surging across Africa, fueled by falling prices and rising energy needs, with the continent turning to China.

In 2025, 18 African countries are expected to install at least 100 MW of new solar capacity - up from just two in 2024. This means more solar will be ...

At least 20 million people globally improved their energy access through solar energy kits (SEKs) sold in 2024, with this growth almost exclusively driven by sales from ...

East Africa stands out as home to some of the most promising zones for solar photovoltaic energy, particularly in Ethiopia, Uganda, and Tanzania, and for wind energy, particularly in ...

Africa experience a surge in renewable adoption, especially with solar energy, in 2025. In this article, we highlight some of the top solar energy projects completed across the ...

East Africa stands out as home to some of the most promising zones for solar photovoltaic energy, particularly in Ethiopia, Uganda, and Tanzania, ...

A record surge of solar panels flowing from China to countries in Africa over the past year is a sign the continent is seeing a rapid build ...

African countries imported a record 15,032 MW of solar panels from China in the 12 months to June 2025, a 60% jump from the ...

In 2025, 18 African countries are expected to install at least 100 MW of new solar capacity - up from just two in 2024. This means more solar will be installed in more countries, boosting the ...

African countries imported a record 15,032 MW of solar panels from China in the 12 months to June 2025, a 60% jump from the prior year. In May alone, imports hit 1.57 GW ...

The following table highlights the top 10 African solar markets by new solar installations (%) in 2024, reflecting the continent's evolving energy landscape and the growing ...

Globally most solar PV is built by utilities, but in Africa 65% of new capacity over the past two years has come from large firms contracting directly with developers.

A record surge of solar panels flowing from China to countries in Africa over the past year is a sign the continent is seeing a rapid build-out of renewable energy.
