---

List of former electrical generating facilities in the United States that had an installed capacity of at least 1,500 MW at the time of their decommissioning. Facilities that permanently shut down all ...

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, ...

Furthermore since this facility is located alongside Nevada Solar One (64 MW capacity), Boulder Solar (150 MW capacity) and Tecren Solar projects (300MW) in the Eldorado Valley thus is ...

The United States has unveiled the largest solar generator on the planet: the Ivanpah Solar Electric Generating System (ISEGS). Located in California's Mojave Desert, this ...

In the first 8 months of 2022, U.S. power generators brought an additional 5.7 gigawatts (GW) of utility-scale wind capacity and 7.5GW of utility-scale solar capacity online, and this growth is ...

In our latest Short-Term Energy Outlook (STEO), we expect that U.S. renewable capacity additions--especially solar--will continue to drive the growth of U.S. power ...

The North America solar-powered generator market is currently experiencing significant growth due to increasing demand for sustainable and off-grid power solutions.

The United States has unveiled the largest solar generator on the planet: the Ivanpah Solar Electric Generating System (ISEGS). ...

Solar is the leading resource for permitted plants, accounting for more than 70% of the 78,039 MW of

permitted generation capacity. Wind and natural gas account for another quarter of ...

Furthermore since this facility is located alongside Nevada Solar One (64 MW ...

This map displays information on location, fuel type, electric generation, generating capacity, ownership, and emissions for over 10,000 power plants across the country.

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW ...
