Which energy storage segment will be the largest in North America?

Pumped-storage hydroelectricity (PSH) segment is expected to be the largest market during the forecast period in North America, owing to its ability to store large amount of energy as compared to other energy storage options and existing installed base. The Compressed air energy storage (CAES) can achieve an efficiency of 70-80%.

Which country is the largest market for energy storage in North America?

The United States is expected to be the largest market for energy storage in North America with an increasing demand for uninterrupted energy demand within the country. The country's power generation is dominated by coal and gas-fired power plants, and it is witnessing a shift from coal-based power generation to cleaner sources of energy.
