-----

Elinor Batteries plans for a giga-scale battery factory near Trondheim, Norway. Based on 100% renewable energy and nordic mineral resources, the factory will supply sustainably produced ...

We are currently developing our plans for a giga-scale battery factory in Orkland, Norway. Elinor will build the factory in modules to limit financial and technological risk.

Elinor Batteries has signed an MoU with SINTEF Research Group to open a sustainable, giga-scale factory in mid-Norway, and HREINN will manufacture 2.5 to 5 million ...

Will GS Yuasa supply a 50MWh lithium-ion battery storage system?GS Yuasa Battery Europe Ltd. are proud to highlight a significant achievement by their parent company GS Yuasa who will ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Morrow Batteries ASA ("Morrow") is receiving the first shipment of battery production equipment this week at the newly established container terminal in Arendal.

- Access to batteries is one of the biggest challenges for the green transition, and we are sitting on advantages that can make Norway a major battery-producing nation. We have spent two years ...

Revac is currently building a solar park with 1,700 solar cells to supply its own production premises with sustainable, short-distance electricity. The ...

This article will introduce the top 10 battery manufacturers in Norway, such as Morrow, FREYR Battery, and TECO 2030.

Morrow Batteries ASA ("Morrow") is receiving the first shipment of battery production equipment this week at the newly ...

Revac is currently building a solar park with 1,700 solar cells to supply its own production premises with sustainable, short-distance electricity. The new Revac plant consists of a 1 MW ...

We are currently developing our plans for a giga-scale battery factory in Orkland, Norway. Elinor will build the factory in modules to limit financial ...

The project aims to support these industries by developing competence into energy efficient battery cell production and enable a world-leading research environment within industrial ...

The project aims to support these industries by developing competence into energy efficient battery cell production and enable a world-leading ...
