-----  
What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

What is a containerised portable sewage treatment plant?

A containerised portable sewage treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary. In addition to that, the systems are modular so that they can work together in a variety of combinations effectively dealing with variable wastewater volumes to achieve any effluent quality.

What is TLS intelligent containerised waste water treatment system (STP)?

TLS intelligent containerised waste water treatment system or sewage treatment plant (STP) is a modular system where all waste water treatment equipment is completely preinstalled in ISO standard or offshore standard containers.

What is an intelligent containerised waste water treatment plant?

Intelligent containerised waste water treatment plants are ready to use immediately on delivery. A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary.

Our intelligent containerised waste water treatment plants offer a fast and effective above ground portable waste water treatment system solution for ...

The complete treatment process including primary settlement, secondary treatment and clarification happens within the container. This type of ...
