What is 2G & 3G technology?

Our 2G & 3G technology offers latest base station technology and transmit powers up to 50W for high capacity, long range networking, and uses Software Defined Radio technology with easy upgrade to new features and high capacities.

Where can cellular equipment be placed in a dense urban area?

In dense urban areas, cellular equipment can also be placed on utility poles or other types of street furniture to provide service to high demand areas. The coverage range of these installations may be as small as a few hundred feet. Often, the macrocells in a given area cannot provide adequate coverage for all of the connected devices.

What is CableFree 2G & 3G?

CableFree 2G & 3G is a modern, fully-supported hardware & software platform to enable GSM, GPRS & UMTS connectivity at very low cost & power consumption compared to legacy equipment vendors. CableFree 2G and 3G Software Defined Base Stations offer advanced features and "stand alone" capability for public or private networks.

3G base stations are essential for reliable communications. Find durable, high-performance antennas for various applications. Shop our selection today.

Advanced CableFree 2G & 3G Cellular Solutions Why 2G & 3G Today? CableFree GSM, GPRS & UMTS Base Stations CableFree 2G and 3G Software Defined Base Stations offer advanced features and "stand alone" capability for public or private networks. Our 2G & 3G technology offers latest base station technology and transmit powers up to 50W for high capacity, long range networking, and uses Software Defined Radio technology with easy upgrade to new features and ...
