-----

The LS0502SCD33 is a complete solution for a system with a backup storage capacitor or capacitor bank. It integrated input overvoltage, an ...

Buy & sell active & passive parts from 750+ manufacturers. Fast shipping available.

The Littelfuse LS0502SCD33S Single Cell Super Capacitor Protection IC for Backup Power Applications is RoHS compliant and ideal for handheld ...

Littelfuse LS0502SCD33 Supercapacitor IC integrates input overvoltage protection, an overcurrent protection circuit, a reverse blocking switch, and a supercapacitor charging control ...

The Littelfuse LS0502SCD33S Single Cell Super Capacitor Protection IC for Backup Power Applications is RoHS compliant and ideal for handheld industrial equipment, dash cameras, ...

With a small footprint of 7.8 mm &#215; 6.4 mm in a compact 24-pin TSSOP package, the BQ33100 maximizes functionality and safety while dramatically increasing ease of use and cutting the ...

The device uses an external nMOSFET to provide input supply-side short-circuit protection; thus, preventing supercapacitor discharge. The ...

It integrates input overvoltage, an overcurrent protection circuit, a reverse blocking switch, and a supercapacitor charging control circuit. It also has built-in cell balance to protect ...

The LS0502SCD33 is a complete solution for a system with a backup storage capacitor or capacitor bank. It integrated input overvoltage, an overcurrent protection circuit, a reverse ...

It integrates input overvoltage, an overcurrent protection circuit, a reverse blocking switch, and a supercapacitor charging control circuit. It ...

In stock at authorised distributor Mouser Electronics is the Littelfuse LS0502SCD33 supercapacitor protection IC from Littelfuse. It is a complete solution for systems with a backup ...

Search across distributors, manufacturers and parts to compare pricing and view inventory & datasheets.

MECCANIXITY Super Capacitor, 3.8V 120F L30mmxD10mm Electrochemical Capacitance, Aluminum Electrolytic Capacitors for On-Board Backup Energy Storage, Pack of 2 Add to cart

The device uses an external nMOSFET to provide input supply-side short-circuit protection; thus, preventing supercapacitor discharge. The MAX17701 provides a safety timer (TMR) feature to ...
