How much does a 20kW Solar System cost in Australia?

Across Australia, a quality 20 kW array installed on a standard iron or tiled roof with no major upgrades falls between \$15 000 and \$22 000, including GST and the federal STC incentive. That headline range converts to roughly \$750 - \$1 100 per installed kilowatt. How many panels are in a 20kW solar system? How much area is required?

Is a 20kW Solar System a good investment?

With a daily power output north of 70kWh each day depending on your location and the position of your property, a 20kW solar system has the potential to generate enough power to pay for the upfront cost and become an ROI positive investment for most businesses in a few short years. How much does a 20kW solar system cost in Australia?

How much does a 20 kW solar system cost?

In 2016, a 20 kW array routinely cost ~ \$32 000 (? \$1.60 /W), matching the \$1.62 /W national average recorded that December. By mid-2025, bulk pricing sits near \$0.90 /W, halving nominal system cost to ~ \$18 000. The drop stems from cheaper modules, a stronger STC market, and intense installer competition.

What is a 20kW Solar System?

A 20kW solar system is a large and future-proof solar system capable of meeting the electricity needs of larger residential properties or small to medium-sized commercial businesses. A 20kW solar system is ideal for properties with significant energy demands and plenty of roof space.

This article provides an overview of the ranges of prices, energy yields (in kWh), and financial returns that a business may expect ...
