How much does a 50kW Solar System cost in Australia?

For a more exact figure, contact our specialists for a free quote. For commercial 50kW solar systems in Australia you will be looking at starting prices of \$45,000 to \$50,000 after rebate, excluding GST. For higher quality components from top tier manufacturers with highly efficient inverters the prices will start from \$55,000.

How much does a 50kW Solar System cost?

On average, a 50kW solar system will cost around \$49,068, including government rebates and other incentives. The true range depends on your location and the brand of solar panels and inverter you go with. The installation cost is usually included in this price range, as a certified installer can only do it. What's the payback period on 50kW solar?

How long does a 50kW Solar System last in Australia?

Most 50kW solar systems in Australia have an average payback period of 4 years. However, depending on your location and energy consumption patterns, the system may pay back in as short as 3 years, or extend to around 5 years. The more energy you consume from your 50kW solar system, the faster it will pay itself back.

What is a 50kW solar package?

Our 50KW solar package provides steady and reliable power for every part of your business, with tier 1 solar panels in an efficient configuration and a solid 50KW solar inverter. We pride ourselves in our strong reputation as the leading provider of commercial solar in Australia.
