-----

Saint Lucia will soon join over 100 countries powered by TESUP technology. Each new destination reinforces our belief that the transition to green energy is not just possible -- ...

Saint Lucia is set to benefit from a multi-million dollar initiative aimed at enhancing energy efficiency and expanding the use of renewable energy.

The modelling of wind power generation system with PMSG and power electronic converter interface along with the control scheme is implemented using a MATLAB/SIMULINK ...

Summary: The Saint Lucia wind and solar energy storage project represents a critical step toward sustainable energy independence in the Caribbean. This article explores its technical ...

With abundant geothermal, wind, and solar resources to more than meet Saint Lucia's peak demand, even partial development of these resources could result in high penetration of ...

Saint Lucia is set to benefit from a multi-million dollar initiative aimed at enhancing energy efficiency and expanding the use of ...

The new regional initiative, developed with the Eastern Caribbean Central Bank and Eastern Caribbean countries, aims to accelerate the uptake of clean, resilient, and ...

Distributed wind installations can range from a less-than-1-kilowatt off-grid wind turbine powering telecommunications equipment, to a 15-kilowatt wind turbine at a home or small farm or a 100 ...

The battery storage technology requirement (such as battery capacity and discharge cycles) is typically less

stringent than in singular solar or wind energy systems. #3 Efficient land use In ...

Additionally, and conditional upon the successful exploration of the resource, Saint Lucia intends to add geothermal energy generation to its renewable energy mix, which would ...

Abstract- This study examines the current generation capacity and load demand of the Caribbean island of Saint Lucia.
