Which South Korean mobile providers use a 5G non-standalone network?

Among South Korean mobile providers, both LG U+ and SK Telecom use a 5G non-standalone (NSA) network configuration, where voice is delivered via VoLTE (using the 4G network), while KT employs a 5G standalone (5G SA) network, where voice is carried over the 5G new radio (VoNR).

Does KT have a 5G network in South Korea?

As of 2024, KT is the only telecom provider in South Korea to have established a nationwide 5G SA network. KT launched its SA 5G service in 2021, becoming the first South Korean operator to do so. SK and LG U+ are operating their communication networks based on 5G NSA (Non-Standalone).

Is SK a 5G operator in South Korea?

KT launched its SA 5G service in 2021, becoming the first South Korean operator to do so. SK and LG U+ are operating their communication networks based on 5G NSA (Non-Standalone). Among these, SK Telecom has limitedly introduced 5G SA (Standalone) for business-to-business (B2B) purposes at SK Hynix factories. 2.

Does Korea have a 5G base station?

Korea's three major telecom operators have focused on building 5G sub-6GHz (3.5GHz) base stations and have gradually abandoned using the 5G 28GHz millimeter-wave (mmWave) spectrum. As a result, Korea's ranking in the proportion of mmWave frequency bands to the global 5G base stations will unlikely catch up with neighboring Japan.

Among South Korean mobile providers, both LG U+ and ...

As of 2024, KT is the only telecom provider in South Korea to have established a nationwide 5G SA network. KT launched its SA 5G service in 2021, becoming the first South ...
