-----  
How many MW of Bess will be installed on Jeju Island?

The capacity will be split between 500MW of large-scale BESS on the Korean mainland and 40MW of the technology on Jeju Island, a popular destination for domestic and international tourists.

Will KEPCO tender a Bess project in 2022?

According to a June 2022 report by Electronic Times (ET News), an information technology media outlet based in South Korea, KEPCO announced its plan to tender contracts to build the five BESS installations, selecting bidders by October of that year.

How many companies are involved in the Bess project?

In total, 14 companies were involved, including HD Hyundai Electric, Hyosung Heavy Industries, LS Electric, Samsung SDI, LG Energy Solution, and others. HD Hyundai Electric announced the completion and start of operation of its 336MW BESS for the utility a couple of months ago.

Will KKR and LG join a Bess project?

The venture will combine LG's battery manufacturing capabilities with KKR's infrastructure financing to jointly bid for large-scale BESS projects overseen by the government.

South Korea's Ministry of Trade, Industry and Energy will host a competitive solicitation for battery storage capacity in two locations.

As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$450,000, varying by location, system size, and market conditions. This translates to around \$200 - \$450 ...

KEPCO, South Korea's biggest electric utility, has welcomed the start of commercial operations at a portfolio of large-scale battery energy storage system (BESS) assets.
