This interactive map shows where small and large-scale wind energy plants are in operation in Switzerland, together with their respective capacities and the quantities of electricity they have ...

Please note that reactions following a new synthetic procedure can be conducted on a small scale, but at least one example should be at a scale of 1 mmol.

Information, power production and wind forecasts are available for the existing wind turbines and wind parks in Switzerland. This is the directory for Swiss firms in the field of wind power.

A modern wind turbine can yield power for up to 2000 households on an area the size of a single-family home. Generating the same amount of electricity from photovoltaics ...

A block-like organization is uncovered in P (NIPAM- co -NIPMAM) microgels synthesized via one-step copolymerization, using a combination of small-angle neutron scattering (SANS), dynamic ...

Small provides the very best forum for experimental and theoretical studies of fundamental and applied interdisciplinary research at these dimensions. Read an attractive mix of peer ...

Using the weather statistics, the answer is: Yes, it is worth investing in wind energy in Switzerland too. A supporting fact is that wind ...

Arylamine small molecules functionalized with multiple primary amino groups and various extended p bridges exhibit outstanding electrochromic switching and long-term stability.

As of today, Switzerland is still far from achieving this goal: the country's almost 40 existing wind turbines produce only 0.14 TWh, or 0.3% of its power. Policymakers now want to accelerate ...

Switzerland lags far behind its neighbours in this regard. Last year, onshore wind energy accounted for over ...

Electrochemical impedance spectroscopy and small-angle X-ray scattering reveal Pt 3 Co's high sensitivity to humidity gradients, highlighting its vulnerability to dealloying and ...

Small Science is a multidisciplinary open access journal publishing the most impactful research from all areas of nanoscience and nanotechnology.

Even a partial development of 30 per cent within the overall wind power potential - equal to about 1,000 wind turbines - could contribute significantly to a more secure electricity ...
