-----

If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit.

Once built, DCEP will be the largest battery energy storage system in the world, highlighting California's leadership in clean energy innovation and infrastructure.

Explore the essentials of energy storage systems for solar power and their future trends.

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt (MW) Bellefield 1 project in Kern County, ...

Luna Storage and LAB are standalone lithium-ion battery storage projects in Lancaster, Los Angeles County, California. These projects store clean energy for use during periods of high ...

Luna Storage and LAB are standalone lithium-ion battery storage projects in Lancaster, Los Angeles County, California. These projects store clean ...

Arevon Energy announced the completion of the two-phase Eland solar-plus-storage project, sited in Kern County, California. The ...

MOJAVE, CA -- Mayor Karen Bass today announced the completion of the Eland Solar-plus-Storage Center project, one of the largest solar and battery energy storage projects ...

One of the US's largest solar + battery storage projects is now fully online in Mojave, California.

By pairing utility-scale solar with advanced energy storage technology, Eland delivers low-cost electricity to

meet LA's growing energy needs -- including when demand ...

Discover how solar panels and battery storage from SCE help you save energy, cut costs, and support a cleaner California.

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt ...

Arevon Energy announced the completion of the two-phase Eland solar-plus-storage project, sited in Kern County, California. The project had capital costs of over \$2 billion ...
