In Egypt, and Arizona, where air conditioning is essential for much of the year, solar-powered airconditioning could offer a sustainable and affordable solution.

Solutions span residential, commercial, and industrial applications, with growing focus on sustainability, smart automation, and renewable energy integration.

This paper examines the potential of utilizing solar absorption cooling systems in institutional buildings by presenting a case study of a proposed solar absorption cooling ...

This study investigates the feasibility of implementing a solar-assisted adsorption chiller in an industrial building at the Oriental Weavers International factory located in 10th of ...

In this thesis, a proposed strategy is developed and applied to a building existing in Egypt. This strategy is aiming to: improve the building energy efficiency, reduce the electrical energy ...

Abstract: Reducing dependency on fossil fuels and the corresponding emissions, absorption chiller systems

offer a sustainable and eco-friendly alternative to conventional refrigeration ...

Consequently, this study was undertaken with the principal objective of examining the feasibility of substituting conventional electrical split air conditioning units with a solar ...
