For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and large batteries, two people ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden ...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in ...

The two people declined to name the Chinese manufacturers of the inverters and batteries with extra communication devices, nor say how many they had found in total.

Despite typical safeguards, including firewalls against direct communication, rogue communication devices have been uncovered in several Chinese solar inverters, raising ...

The two people declined to name the Chinese manufacturers of the inverters and batteries with extra communication devices, nor say ...

U.S. energy officials are quietly exploring a potentially major national security threat: unrecorded communication devices built into Chinese-made inverters and batteries that ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters ...

Investigations have revealed that certain Chinese-made solar inverters and batteries contain undocumented
