-----

At the intersection of technology and environmental conservation, two photovoltaic power stations in Switzerland and China have witnessed the passage of time, inscribing a glorious chapter in ...

The idea came to fruition in April, with the inauguration of a removable solar power plant along a stretch of railway tracks in Buttes, in western Switzerland.

The world's largest 1 GW offshore solar farm located off the coast of Dongying, Shandong Province, China is now connected to the grid.

China is using the high-altitude expanse for immense solar panel farms and wind turbines and has begun work on the world's largest ...

The higher the winter electricity production, the more the solar PV panel can contribute to securing a reliable supply and to reducing electricity imports in Switzerland.

The continent imported 60% more solar panels from China over the past year, though a lack of reliable installation data makes it a challenge to track the true pace of ...

For a 100-megawatt molten salt solar storage system, Sulzer is supplying high-performance, state-of-the-art pump technology that can withstand the high temperature and ...

The continent imported 60% more solar panels from China over the past year, though a lack of reliable installation data makes it a ...

Two 1-gigawatt solar power stations in southwest China's Yalong River basin were put into operation on

December 31, accelerating the development of the region's integrated ...

China is using the high-altitude expanse for immense solar panel farms and wind turbines and has begun work on the world's largest hydroelectric dams.

China has brought a 1 GW offshore solar power plant online off the coast of Dongying, Shandong province, combining PV with energy storage and aquaculture in what is ...

The idea came to fruition in April, with the inauguration of a removable solar power plant along a stretch of railway tracks in Buttes, in ...

China continues its relentless expansion of solar power capacity, now home to the world's largest solar plant. The 2.2 gigawatt facility spans an area of over 25 square kilometers in the Gobi ...
