---

Spain is poised to lead Europe in renewable energy by constructing the continent's largest pumped storage power plant. ...

Spain's storage landscape is diversifying with BESS and pumped hydro projects across multiple regions, led by major utilities and new market entrants, and a connection ...

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It ...

Spain is set to become a leader in renewable energy with the construction of the continent's largest pumped storage power plant. Managed by Iberdrola, the Conso II project ...

Iberdrola Spain has begun commissioning the 225 MW Valdecañas pumped hydro energy storage (PHES) plant and expects to ...

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will ...

The European Commission has approved a significant EUR700 million (approximately \$763 million) aid scheme to propel the deployment of large-scale energy storage across ...

Spain is investing significantly in renewable energy with the construction of Europe's largest pumped storage power plant. Managed by Iberdrola, the Conso II project in ...

The capacity of 1.8GW means Conso II will significantly contribute to Spain's energy grid and provide a
