What types of solar inverters are available in NZ?

There are different types of inverter available. This includes inverters that can connect to the electricity grid based on your home's connection. One of the most common types of solar inverter in use in NZ, however, is the hybrid inverter.

Who are Sungrow solar inverters?

A global inverter and storage manufacturer with a complete range of products for solar and storage projects in Australia and New Zealand. Sungrow make a complete range of solar inverters and energy storage products for residential, commercial, industrial and utility grade solar projects.

What is a solar inverter?

A solar inverter is a critical component of a solar energy system, responsible for converting the direct current (DC) power generated by solar panels into alternating current (AC) power that can be used to power homes and businesses. The process of converting DC to AC involves several stages, including the following:

Who should install a solar inverter?

Solar inverters should always be installed by a professional installer, like ZEN Energy, with experience in solar energy systems. Attempting to install a solar inverter yourself could be dangerous and may also result in damage to the inverter, the solar panels, or other components of your solar energy system.

Available from 3 to 10 kW in both the single phase "Primo" and three phase "Symo". Being such a highly efficient AC-coupled inverter, we often also ...
