The Delta OutD cabinet is the choice from the tropics to the arctic when space is scarce or site density needs to be increased cost-effectively. The Delta OutD series offers several size ...

Available in different configurations, Delta OutD cabinets are designed to protect equipment from external threats in all climates from the tropics to the arctic.

The cabinet works very well as a stand-alone power and/or battery backup solution and provides additional space for telecom equipment.

The cabinet can handle up to 4.4kW of photovoltaic input and 600W to 2000W of wind power, providing a versatile and eco-friendly power solution for urban and rural smart city projects.

These cabinets not only provide essential physical protection for various communication devices but also support continuous power supply through intelligent power management systems, ...
