Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ...

What is the difference between `super T` and `extends T`? I used to use `extends T`, but it does not allow me to add elements to it `list.add(e)`, whereas the `Li...`

Waterproof portable powerbox stations with LiFePO4 batteries. PS2400 & Powerbox+ series for camping, marine & emergency backup. Up to 2400W solar charging.

Multi-Purpose Outdoor Power Bank: BLAVOR portable solar charger is built to survive any adventure. IPX5 waterproof, dustproof, and shockproof, it keeps your devices ...

Portable waterproof power station with a 1,000 CCA DL+ 12V 60Ah lithium battery for starting car, boat & truck engines. One lithium battery box to power everything.

If we're using a class method, we don't have an instance to call `super` with. Fortunately for us, `super` works even with a type as the second argument. --- The type can be passed directly to ...

"super" object has no attribute "`__sklearn_tags__`". This occurs when I invoke the `fit` method on the `RandomizedSearchCV` object. I suspect it could be related to compatibility ...

As for chaining `super::super`, as I mentioned in the question, I have still to find an interesting use to that. For now, I only see it as a hack, but it was worth mentioning, if only for the differences ...

The dual USB ports support quick charging, saving precious time, and the waterproof, shockproof design

offers peace of mind in rugged environments. Its combination of ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

The automatic insertion of `super()` by the compiler allows this. Enforcing `super` to appear first, enforces that constructor bodies are executed in the correct order which would ...

`super()` lets you avoid referring to the base class explicitly, which can be nice. But the main advantage comes with multiple inheritance, where all sorts of fun stuff can happen.

Microgreen offers large-scale energy storage that is reliable in harsh environments, cost effective with top energy density, and provides best return on investment.

`super()` is a special use of the `super` keyword where you call a parameterless parent constructor. In general, the `super` keyword can be used to call overridden methods, ...

"My Big Battery system has performed flawlessly since installation in 2022. The additional performance of the Lithium batteries is amazing. Dylan was very helpful troubleshooting a ...

The one without `super` hard-codes its parent's method - thus it has restricted the behavior of its method, and subclasses cannot inject functionality in the call chain. The one ...
