---

With its hydroelectric power plants in the Alps and innovative projects, Switzerland is contributing to the search for solutions for the efficient, long-term storage of electricity.

Energy storage is rapidly become more and more relevant due to the increasing renewable energy fraction in the grid, the rise of photovoltaics ...

Switzerland's new EUR2 billion energy storage initiative isn't just another infrastructure project - it's a moonshot combining hydropower tradition with cutting-edge tech.

With this large-scale storage system, we are making an important contribution to implementing Switzerland's Energy Strategy 2050. The ...

Public funds are being invested in a wide range of projects, and the industry (from major power producers to startups) is dedicating large teams to develop their own storage ...

Energy storage is rapidly become more and more relevant due to the increasing renewable energy fraction in the grid, the rise of photovoltaics and the increase in electric cars.

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland from 20MW to 28MW, making it ...

Switzerland's latest battery energy storage system (BESS) entrant has hti the ground running, with two 2 MW projects with Schindler and Energie Wettingen either live or ...

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in ...

The Swiss FlexGrid agreements with Schindler Group and Energie Wettingen AG are most relevant here, as they extend Energy Vault's reach beyond large utility projects into ...

In a first step, this project, which is funded by the Swiss Federal Office of Energy, aims to quantify the benefits of decentralized, customer-side battery storage for the distribution grid. In a ...

With this large-scale storage system, we are making an important contribution to implementing Switzerland's Energy Strategy 2050. The country is pursuing the goal of transitioning its ...

Information on national and international energy research projects with Swiss partners can be found on various search platforms, depending on how projects are funded.
