Does Tajikistan have a mining industry?

Despite its vast mineral resources, many are not mined or are mined primitively. However, as future demand for critical raw materials increases amidst developments in the global energy transition, Tajikistan's mining industry holds much untapped potential. Coal currently significantly contributes to Tajikistan's energy mix.

Why should Tajikistan invest in hydropower?

In addition to its vast hydropower export potential, Tajikistan's hydrogen production potential and reserves of critical raw materials, such as manganese, lead, aluminum and zinc, should be leveraged to enable Tajikistan's energy transition and to generate novel export revenue streams.

How much energy does Tajikistan import?

In 2022, Tajikistan's net energy imports amounted to 44,858 TJ, roughly 28% of total energy supply. In 2023, the oil and gas imports constitute the largest share of Tajikistan's imports value, which is 16.78% (approximately \$957,46 million).

How does Tajikistan improve its energy security?

Tajikistan seeks to strengthen its energy security by harnessing its vast hydropower potential and expanding coal production. Tajikistan's economy is among the least carbon-intensive in the region, with the carbon emissions intensity of GDP roughly 31% lower than global average.
