What is a battery management system (BMS)?

Voltaplex is proud to design and manufacture battery management systems (BMS) that optimize lithium-ion battery packs' safety, reliability, and performance. We engineer our solutions for seamless integration across various industries, including robotics, automotive, and medical devices.

What is a BMS solution?

BMS solutions are indispensable in applications employing intelligent battery systems, significantly enhancing performance and extending battery longevity across a wide spectrum of industries. Explore a selection of our premier BMS products below.

What is inside a voltaplex BMS battery management system?

Inside every Voltaplex BMS battery management system is a purpose-built core. This core contains microcontrollers, precision voltage sensors, temperature monitors, balancing circuits, and communication protocols tailored to you and your industry's needs.

How does embitel BMS work?

For this, Embitel provides a variety of algorithms as part of BMS solution that extend the battery's lifespan and efficiency under stress. In order to detect Over-Voltage and Under-Voltage, BMS actively monitors the voltage of each cell and the battery pack. The battery pack is protected from overcharging and over discharge via overcurrent monitoring.

Discover our advanced BMS solutions, designed to enhance performance, extend battery life, and provide reliable energy management.

At Greenlink-ReGen, we specialize in cutting-edge Battery Energy Storage Systems (BESS) that optimize solar PV performance, minimize generator reliance, and stabilize power supply in ...

At Promwad, we design custom BMS hardware and embedded software for Li-ion, LiFePO₂, and other chemistries, optimised for your application's performance, capacity, cost, and safety ...

This BMS is designed for the management of 7-16 series lithium batteries, with a continuous charge and discharge current of 100A. It features an integrated design that combines functions ...

Next-generation thermal management systems maintain optimal operating temperatures with 40% less energy consumption, extending battery lifespan to 15+ years. Standardized plug-and-play ...

Voltaplex is proud to design and manufacture battery management systems (BMS) that optimize lithium-ion battery packs' safety, reliability, and performance. We engineer our solutions for ...

Ensuring high battery safety and performance requires a reliable battery management system. Leverage our expertise to develop both hardware ...

We offer both Custom BMS Solutions and Ready-to-Deploy Platforms to meet diverse customer needs. With real-time diagnostics, precise voltage and temperature regulation, and advanced ...

Smart Battery Monitoring Systems (BMS) are transforming how we manage energy storage, especially in electric vehicles, renewable energy setups, and portable devices. ...

Ensuring high battery safety and performance requires a reliable battery management system. Leverage our expertise to develop both hardware and software that ensure precise control and ...

Voltaplex is proud to design and manufacture battery management systems (BMS) that optimize lithium-ion battery packs' safety, reliability, and ...

Our expertise in developing customizable and robust BMS ensures optimal battery performance, safety, and longer life cycles, empowering you to lead the EV market.

This BMS is designed for the management of 7-16 series lithium batteries, with a continuous charge and discharge current of 100A. It features an ...

At Greenlink-ReGen, we specialize in cutting-edge Battery Energy Storage Systems (BESS) that optimize solar PV performance, minimize generator ...

Our expertise in developing customizable and robust BMS ensures optimal battery performance, safety, and longer life cycles, empowering you to ...
