What does Catholic energies do?

Catholic Energies provides expertise to design, implement, and finance sustainable projects that reduce energy costs, enabling other Catholic organizations to use those savings in support of their critical ministries. It's not just the Catholic Church and the Holy See that are transitioning their parishes to renewable energy sources like solar.

How do Agrivoltaics work?

Agrivoltaics involves the dual use of land for solar energy production and agriculture. They are built with a series of solar panels that coexist with crops, livestock or both. Sometimes the solar arrays are situated on top of greenhouses, interwoven among crops, or elevated plants. Where is the Vatican's solar installation located?

Is the agrivoltaic project a fruit of Pope Leo XIV?

The agrivoltaic project is one of those "good practices" Pope Francis called for in his encyclical a decade ago. Yet it is also a fruit of the new pontificate. Pope Leo XIV, continuing and expanding the green path charted by his predecessor, has given the initiative fresh momentum.

Why is Maasin Diocese installing solar panels?

The Maasin diocese was recognized as the first in the world to equip its churches with solar panels. By installing solar panels in our 42 parish churches, the diocese will try to avoid 191 metric tons of carbon dioxide emissions over the next 25 years through the generation of solar power.

The late Pope Francis leaves behind more than a theological legacy--his push for a solar-powered Vatican has set a new benchmark ...

According to the Vatican's press office, the installation will apply the most advanced solutions currently available, balancing clean energy generation with the preservation of ...

Pope Francis made a game-changing policy announcement to end pernicious dirty energy sources.

In 2025, the Vatican City flipped the switch on something much bigger than its size. A full transition to solar power. So from now on, the seat of the Catholic Church runs ...

The late Pope Francis leaves behind more than a theological legacy--his push for a solar-powered Vatican has set a new benchmark for sustainable MEP practices in heritage ...

This article explores how lithium-ion technology is reshaping energy management in religious and cultural hubs like the Vatican, while highlighting opportunities for global suppliers.

Part of Pope Francis' dream was to ensure the city state in Rome ran on green energy. An agrivoltaic plant on Vatican property is the result.

In 2025, the Vatican City flipped the switch on something much bigger than its size. A full transition to solar power. So from now on, ...

According to the Vatican's press office, the installation will apply the most advanced solutions currently available, balancing clean ...

Pope Francis has ordered the Vatican to install a solar plant that will provide electricity to the entire city state, as the pontiff does his bit to tackle climate change.

The global energy storage battery cabinet market is experiencing unprecedented growth, with demand increasing by over 500% in the past three years. Battery cabinet storage solutions ...

Welcome to Vatican power storage ambitions - where ancient walls meet cutting-edge renewable tech. With just 825 residents, you might wonder why this microstate's energy ...
