Why are Palestinians not able to access 3G & 4G?

Still, Palestinians in the West Bank and Gaza face significant barriers to digital access imposed by the Israeli occupation. In the West Bank, the Israeli government imposed restrictions on Palestinian telecommunications companies that were only granted access to 3G technology in 2018 and 4G in early 2023.

How many base stations will 5G have in 2025?

The U.S. has ambitious plans for 5G expansion, aiming to have more than 300,000 active base stations by 2025. This goal is being driven by investment from private telecom providers and government initiatives like the Rural 5G Fund. For businesses in the U.S., this means increasing access to high-speed connectivity.

How many 5G base stations does China have?

China has deployed over 2.4 million 5G base stations as of 2023, accounting for over 60% of the global total. China is leading the 5G revolution. With over 2.4 million base stations, the country accounts for more than 60% of all 5G infrastructure globally.

How many mobile connections are there in Palestine?

Data from GSMA Intelligence shows that there were 4.41 million cellular mobile connections in Palestine at the beginning of 2025. For perspective, many people make use of more than one mobile connection, so it's not unusual for mobile connection figures to significantly exceed figures for total population.
