Does Tokyo Gas have a battery energy storage system?

Tokyo Gas is also participating in the Japanese utility-scale battery energy storage system (BESS) market, signing a 20-year tolling offtake deal with Australian developer Eku Energy for a forthcoming 30MW/120MWh project.

Does Japan need energy storage?

With Japan targeting a 36-38% share of renewable energy in its generation mix by 2030 and carbon neutrality by 2050, the government identified support for and promotion of energy storage as a key pillar of the Green Transformation Act announced in 2021.

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.

How is Japan's energy storage landscape changing?

Japan's energy storage landscape is shifting, pushed by household demand, corporate ESG mandates, and domestic battery manufacturing. The residential lithium-ion market, projected to grow at a CAGR of 33.9% through 2030, remains one of the fastest-expanding segments.

Tokyo Asset Solution will diversify into battery storage, starting with a 4.9MWh grid-scale project in Hachioji City, Tokyo, and a co ...

Tokyo's distributed energy storage network exemplifies how cities can achieve energy security while advancing sustainability. By combining cutting-edge technology with smart policies, it ...

Tokyo Century Corporation entered into agreement to acquire 49% stake in 67 MW Breach solar farm in Cambridgeshire from Octopus Renewables Infrastructure Trust plc.

With renewable energy accounting for 38% of Tokyo's power mix as of March 2025, the metropolitan area faces a pressing question: How do we store solar and wind energy efficiently ...

Home battery storage aggregation projects have launched with participation of Tokyo Electric Power Co, and Tokyo Gas, two major utility ...

Growth is underpinned by Tokyo's 2025 regulation requiring solar panels on new homes and the country's push for virtual power plants (VPPs), which will enable households to ...

Going forward, the plan is to launch the first energy storage station around fiscal 2025, and then proceed with the development and operation of energy storage stations one after another.

At the Energy Storage Summit Asia 2024, held last month in Singapore and hosted by our publisher Solar Media, Eku Energy's APAC technical lead Nick Morley said that having started ...

They're now leading Asia's energy storage race while dancing between volcanic eruptions and typhoons. Let's unpack how this island nation became a lab for new energy ...

Home battery storage aggregation projects have launched with participation of Tokyo Electric Power Co, and Tokyo Gas, two major utility companies in the Japanese capital.

Tokyo Asset Solution will diversify into battery storage, starting with a 4.9MWh grid-scale project in Hachioji City, Tokyo, and a co-located 8.3MWh system at the ...

The energy storage arm of Chinese solar PV inverter manufacturer Sungrow signed a contract with Sun Village at a ceremony in Japan's capital, Tokyo, last week during ...
