-----

According to foreign media reports, the Ukrainian parliament recently voted to cancel all taxes and tariffs on imported energy equipment to cope with the severe energy crisis ...

Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self-consumption solar PV systems to keep the lights on.

Ukraine's solar market is booming amid blackouts. See 2025 demand drivers, payback, financing tools and risks - a guide for foreign PV investors.

Since Russia's invasion of Ukraine in February 2022, Ukraine's energy infrastructure and power grid have been key targets of Russian attacks, aimed at weakening the country's resilience.

However, with the majority of PV capacity installed only recently and with a finite lifespan, Ukraine will soon face significant volumes of decommissioned PV modules requiring processing, ...

Ukraine's solar market is booming amid blackouts. See 2025 demand drivers, payback, financing tools and risks - a guide for foreign ...

Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self ...

Due to the heatwave in July, the energy consumption in Ukraine hit maximum levels, leading to significant energy shortages in the system and causing necessary scheduled ...

Yet, amid the darkness lies an opportunity to rebuild the energy sector not only to survive the war but to emerge stronger, greener, and more self-reliant. Ukraine's import ...

Explore the strategic choice for a solar module factory in Ukraine. Analyze the business case for domestic reconstruction vs. the high-value EU export market.

Most solar PV modules are imported from China, or have been donated since February 2022. In 2018, import duties on solar panels were removed and in July 2024 this was temporarily ...

Due to the heatwave in July, the energy consumption in Ukraine hit maximum levels, leading to significant energy shortages in the ...

This report explores the current policy landscape for distributed solar PV in Ukraine and outlines three potential policy options to accelerate the deployment of this technology.

Yet, amid the darkness lies an opportunity to rebuild the energy sector not only to survive the war but to emerge stronger, greener, and ...
