This research will present the design and implementation of a practical smart weather station system, which can be further extended.

It involves setting up 8 automatic stations in Tashkent city and 7 regions. Additional stations will be installed in Andijan, Namangan, ...

Small-scale weather stations use advanced sensors, data processing, and IoT technology to accurately collect and analyze environmental data. They not only enhance ...

Automatic weather stations (AMS) will be installed at the stations in the regions of the country. Undoubtedly, this is a useful and necessary acquisition for meteorologists of ...

It involves setting up 8 automatic stations in Tashkent city and 7 regions. Additional stations will be installed in Andijan, Namangan, Navoi, Fergana, Bukhara, ...

Students learned how landslides and mudflows occur, and how weather conditions can trigger them. They took ownership of the new weather stations, learning to maintain the equipment ...

To improve the quality of observations, a modern automatic station was installed, providing continuous data on temperature, humidity, precipitation, wind, solar radiation and soil ...

An industrial model of a weather station has been created at the National Research Institute of Renewable Energy Sources under the Ministry of Energy to measure ...

Established back in 2003, Lakshmi Engineering Works has built its name in the domain and become one of
