OverviewHistoryAttributesDesignOperationSpecific energy and energy densityApplicationsDevelopmentPissoort mentioned the possibility of VRFBs in the 1930s. NASA

researchers and Pellegrini and Spaziante followed suit in the 1970s, but neither was successful. Maria Skyllas-Kazacos presented the first successful demonstration of an All-Vanadium Redox Flow Battery employing dissolved vanadium in a solution of sulfuric acid in the 1980s. Her design used sulfuric acid electrolytes, ...
