How many large-scale storage systems does Victoria have?

Victoria has 12 commissioned large-scale storage systems and 3 in commissioning - with a total output capacity of 1028 MW and storage capacity of more than 1.7 GWh. Storage capacity = how much total energy is stored in each battery. Output capacity = how much energy a battery can provide at a given time.

Why do we need a new power system in Victoria?

It will help support a more resilient power system in Victoria, and a more reliable energy supply for our customers as the energy market continues to evolve," said Shell Energy Australia Chief Executive Officer, Tony Keeling.

Why did Victoria switch on a battery energy storage system?

One of the biggest battery energy storage systems built in Victoria has been officially switched on, providing essential system services for the electricity grid and helping to increase the state's renewable energy hosting capacity.

How many energy storage projects are there in western Victoria?

In March 2018, 2 projects in Western Victoria were chosen to be part of The Energy Storage Initiative - one in Ballarat and one in Gannawarra. Construction for the Ballarat and Gannawarra Energy Storage Systems was completed in late 2018. Both batteries began operating over the summer of 2018 and 2019.

The Rangebank storage system will help support grid stability and is expected to have the storage capacity to power the equivalent of 80,000 homes across Victoria for one ...

The firm capacity delivered by Victoria's energy storage targets will provide reliable, affordable and clean energy as Victoria's ageing and increasingly unreliable coal ...

Once operational, the Rangebank BESS will have the capacity to power 80,000 Victorian homes for one hour during peak times, which is equivalent to supplying five hours of ...

The 240-MW/480-MWh battery energy storage system (BESS) on Victoria's Mornington Peninsula has been successfully ...

Developer ACEnergy has seen its 350MW/770MWh Little River battery energy storage system (BESS) fast-tracked by the Victoria government in Australia. The BESS is the ...

The 240-MW/480-MWh battery energy storage system (BESS) on Victoria's Mornington Peninsula has been successfully energised, electricity transmission network ...

The Rangebank storage system will help support grid stability and is expected to have the storage capacity to power the equivalent of ...

One of the biggest battery energy storage systems built in Victoria has been officially switched on, providing essential system ...

One of the biggest battery energy storage systems built in Victoria has been officially switched on, providing essential system services for the electricity grid and helping to ...

Developed jointly by Eku Energy, Shell Energy, and Perfection Private, the Rangebank BESS is designed to enhance grid stability and ...

Developer ACEnergy has seen its 350MW/770MWh Little River battery energy storage system (BESS) fast-tracked by the Victoria ...

Developed jointly by Eku Energy, Shell Energy, and Perfection Private, the Rangebank BESS is designed to enhance grid stability and provide crucial energy storage ...

Once operational, the Rangebank BESS will have the capacity to power 80,000 Victorian homes for one hour during peak times, ...

The Ballarat Energy Storage System provides back-up power and grid stabilisation, vital to maintaining a reliable and affordable energy supply in Western Victoria.

The firm capacity delivered by Victoria's energy storage targets will provide reliable, affordable and clean energy as Victoria's ...
